To Whom It May Concern,

RE: Kyle Wood – Quick Computer Fix

We have been very pleased with the service and quick response to our “IT” needs by Kyle. What I especially like is Kyle’s willingness to train us so we are not always calling him. Other companies leave you in the dark because that’s how they make their money. You become dependent on that company for even the smallest of needs.

Kyle is very patient in working with us and resolving any problems we are having with our computers, networking and mobile devices. And he shows us how to handle the problem should it arise again.

What’s more, Kyle’s fees are very fair. As a small company and with today’s economy this is extremely important to us as well.

Most people don’t understand computers, networking, and the mumbo jumbo that goes with these. We are truly at the mercy of others. Because of this, we can be and have been taken advantage of for services and equipment that we don’t need. This is not something we have to worry about in dealing with Kyle.

Kyle is someone I recommend strongly. Kyle provides great service and at a fair price.

Sincerely,
Lynda Jungkind
President
